ARIEL GOODWIN

657 Frank H.T. Rhodes Hall ◇ Ithaca, NY 14853

+1 · 607 · 319 · 9989 ◇ awg77@cornell.edu ◇ arielgoodwin.github.io ◇ Google Scholar

EDUCATION

Ph.D. Applied Mathematics 2022 - 2027 (Expected)
Cornell University, Center for Applied Mathematics GPA: 4.00/4.00

Committee: Adrian Lewis (Advisor), Anil Damle, and Soroosh Shafiee

M.Sc. Applied Mathematics 2022 - 2025
Cornell University, Center for Applied Mathematics GPA: 4.00/4.00

B.Sc. Honours Mathematics and Computer Science 2018 - 2022
McGill University, Department of Mathematics GPA: 3.98/4.00

RESEARCH ACTIVITY

Visiting Graduate Student Summer 2026
Halıcıoğlu Data Science Institute, University of California, San Diego

· Hosted by Dmitriy Drusvyatskiy for a research project on the geometry of decision trees

NSERC Postgraduate Scholarship - Doctoral (PGS D) 2024 - 2027
Natural Sciences and Engineering Research Council of Canada (NSERC), held at Cornell University

· To support doctoral research

NSF Mathematical Sciences Graduate Internship Summer 2023
National Science Foundation (NSF), held at the National Laboratory of the Rockies (formerly NREL)

· Hosted by Jonathan Maack for a research project on manifold optimization for optimal power flow

NSERC Undergraduate Student Research Award Summer 2021
NSERC, held at McGill University

· Conducted research on convex optimization for statistical estimation, supervised by Rustum Choksi

NSERC Undergraduate Student Research Award Summer 2020
NSERC, held at McGill University

· Conducted research on nonsmooth optimization for projection problems, supervised by Tim Hoheisel

SCHOLARSHIPS

Cornell Fellowship 2022
Cornell University

· Recruitment fellowship for academic merit, covering one year of Ph.D. studies

Sir Edward Beatty Memorial Scholarship in Mathematics 2021
McGill University

· For academic achievement in mathematics

Dr. Feng Qian Scholarship 2020
McGill University

· For academic achievement in computer science

Seba Abbott Smith Scholarship 2018 - 2022
McGill University

· For academic merit and leadership in (post)-secondary school

PUBLICATIONS AND PREPRINTS

Circumcenters and mean sets in Hadamard space: horospherical subgradient methods
With A. S. Lewis, G. López-Acedo, and A. Nicolae. *Mathematics of Operations Research*, 2026.

Minimal enclosing balls via geodesics
With A. S. Lewis. *Preprint*, arXiv:2603.15488, 2026.

Stochastic and incremental subgradient methods for convex optimization on Hadamard spaces
With A. S. Lewis, G. López-Acedo, and A. Nicolae. *Mathematical Programming*, 2026.

Recognizing weighted means in geodesic spaces
With A. S. Lewis, G. López-Acedo, and A. Nicolae. *Foundations of Computational Mathematics*, 2025.

Convex optimization on CAT(0) cubical complexes
With A. S. Lewis, G. López-Acedo, and A. Nicolae. *Advances in Applied Mathematics*, 2025.

Maximum entropy on the mean and the Cramér rate function in statistical estimation and inverse problems: properties, models, and algorithms
With Y. Vaisbourd, R. Choksi, T. Hoheisel, and C.-B. Schönlieb. *Mathematical Programming*, 2025.

Power flow geometry and approximation
With J. Maack and D. Sigler. *IEEE Transactions on Power Systems*, 2025.

Riemannian optimization applied to AC optimal power flow
With J. Maack and D. Sigler. *IEEE Power & Energy Society General Meeting*, 2024.

From perspective maps to epigraphical projections
With M. P. Friedlander and T. Hoheisel. *Mathematics of Operations Research*, 2023.

TEACHING EXPERIENCE

Ithaca High School Math Seminar, Instructor 2025
Cornell University, Ithaca High School

· Designed and taught a seminar on mathematical optimization for advanced high school students

Teaching Assistant 2023 - 2024
Cornell University

· MATH 2930: Differential Equations for Engineers (Summer 2024)
· MATH 2940: Linear Algebra for Engineers (Spring 2024)
· MATH 1920: Multivariable Calculus for Engineers (Fall 2023)

Teaching Assistant 2019 - 2021
McGill University

· MATH 248: Honours Vector Calculus (Fall 2021)
· PHYS 131: Mechanics and Waves (Fall 2019/2020/2021)

SERVICE AND OUTREACH

Center for Applied Math, Mentor 2023 - 2027
Cornell University

· Mentoring applied math Ph.D. students in their transition to graduate school

Summer Research Conference, Moderator 2026
University of California, San Diego

· Moderated undergraduate research presentations

Association for Women in Mathematics, Mentor 2026
Cornell University

· Mentored an undergraduate mathematics student

Ithaca High School Math Seminar, Research Mentor 2026
Cornell University, Ithaca High School

· Mentored advanced high school students on a research project in optimization

Directed Reading Program, Mentor 2024 - 2025
Cornell University

· Mentored undergraduate students in projects on differential geometry, probability, and optimization

Reviewer

· *Mathematical Programming, Mathematics of Operations Research, Journal of Optimization Theory and Applications, SIAM Journal on Optimization, SIAM Journal on Applied Algebra and Geometry, IEEE Transactions on Power Systems*

CONFERENCES AND PRESENTATIONS

Minimum Enclosing Ball Algorithms in Geodesic Spaces December 2026 (Upcoming)
Canadian Mathematical Society Winter Meeting, Montreal Talk

Minimum Enclosing Ball Algorithms in Geodesic Spaces November 2026 (Upcoming)
INFORMS Annual Meeting, San Francisco Talk

Minimum Enclosing Ball Algorithms in Geodesic Spaces August 2026
Institute for Foundations of Data Science Research Expo, University of Wisconsin–Madison Poster

Subgradient Methods on Nonpositively Curved Geodesic Spaces June 2026
SIAM Conference on Optimization, University of Edinburgh Talk

Subgradient Methods in Geodesic Spaces October 2025
Young Researchers Workshop, Cornell University Poster

Incremental Minimization in Spaces of Nonpositive Curvature July 2025
International Conference on Continuous Optimization, University of Southern California Talk

Incremental Minimization in Spaces of Nonpositive Curvature November 2024
Midwest Optimization Meeting, University of Waterloo Poster

The Maximum Entropy on the Mean Method for Linear Inverse Problems July 2022
International Conference on Continuous Optimization, Lehigh University Talk

SKILLS AND INTERESTS

Computational Skills	Scientific programming, primarily in Julia and Python, with experience in C++, C, OCaml, Java, and MATLAB; proficient with AI-assisted research workflows for proof exploration, algorithm implementation, and numerical experimentation
Research Interests	Nonsmooth Optimization, Convex Analysis, Non-Euclidean Geometry, Optimization Algorithms, Data Science
Languages	English, French
